

Adler Mobile Navigation App Documentation

1. Home Screen: This is the screen as the app launches.

Things needed/To be modified:

- An updated image for the home screen.
- Font styling.
- Maps to be removed and incorporated in navigation bar.
- Maps tab to be replaced by hours and show times, which will be read through a web stream. Needs to be set up.
- Any additional features or displays that need to be shown here.

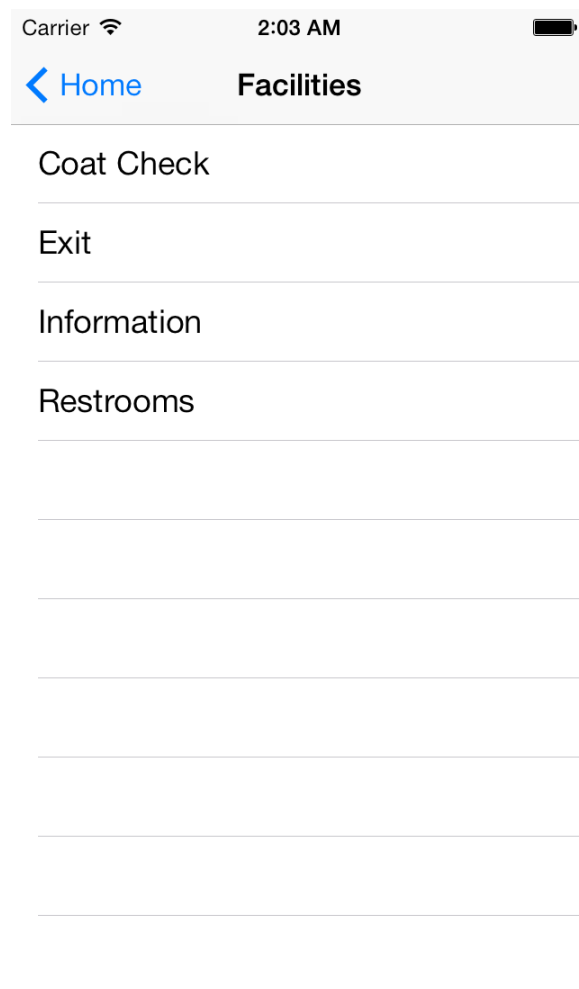

Ending in '?' – If you could provide a feedback.

2. Facilities: Tab that allows access to commonly looked for location.

Things needed/To be modified:

- To be extended to navigation in order to allow user to navigate to the location.
- Text Style.
- Background image or a table view is okay?
- Any other facilities that needs to be added.
- Allow user to switch to wheelchair access mode which navigates through elevators instead of stairs and entry/exit through wheelchair access entrances.

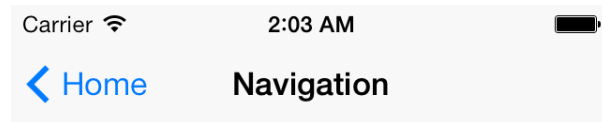

Ending in '?' – If you could provide a feedback.

3. Navigation Home: Allows user to input source and destination.

Things needed/To be modified:

- Fairly straightforward layout, would you want any further styling?
- Top right to allow user to view the maps – this is where the maps tab will be incorporated.
- Any other changes? Background image?

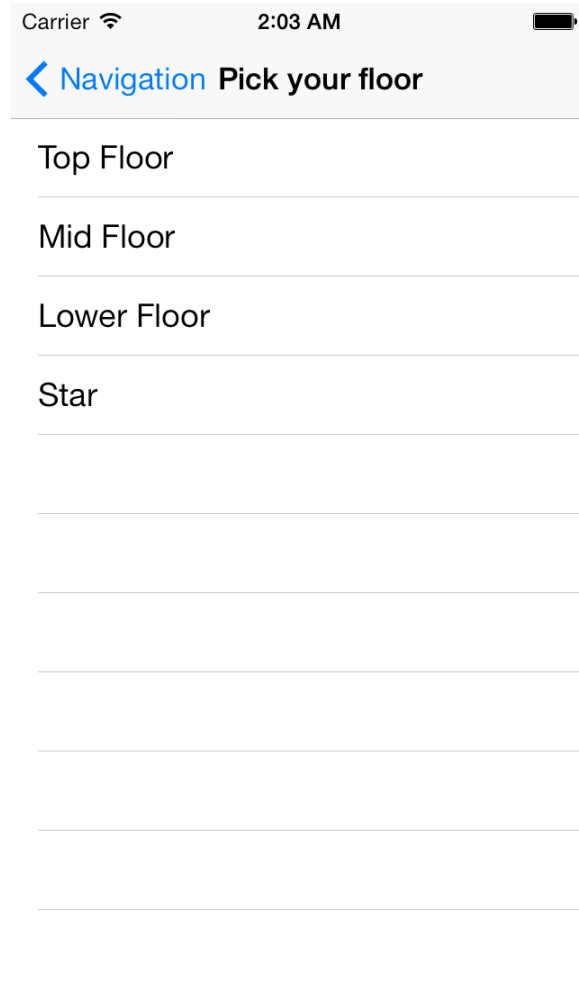

Ending in '?' – If you could provide a feedback.

4. Floor Display:

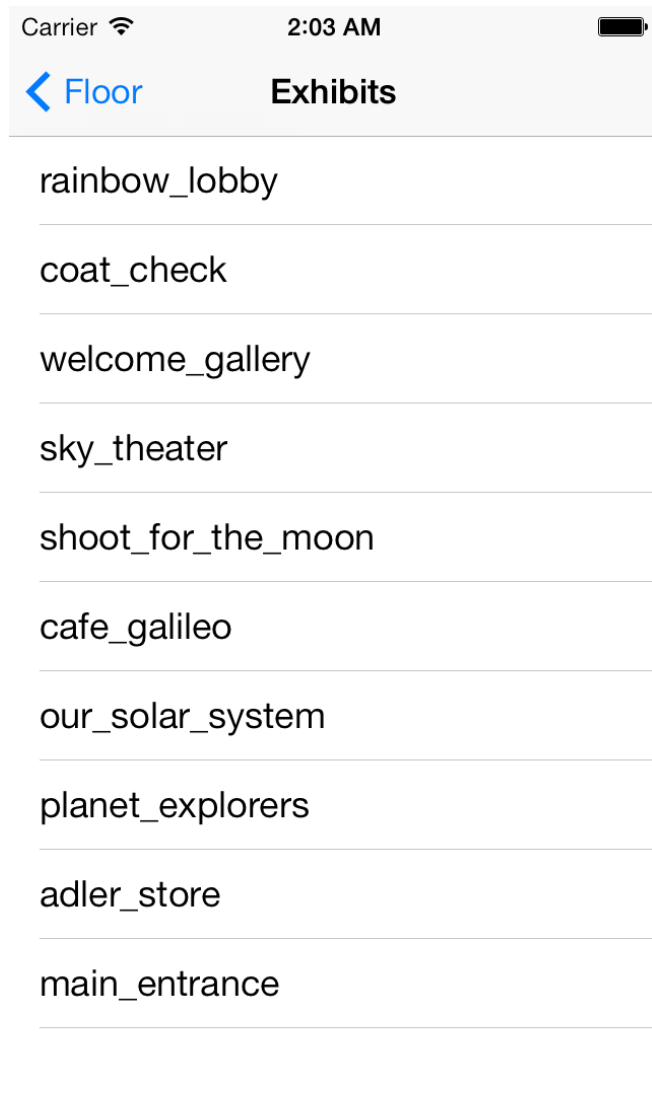

Things needed/To be modified:

- Styling.
- Any other possible way group data and display to the user.
- Allow user to access list of exhibits for each floor?

Ending in '?' – If you could provide a feedback.

5. Exhibit List for navigation:
- Things needed/To be modified:
- Exhibits Name Styling.
 - Allow user to view exhibit info?
 - Any other display/style changes required.

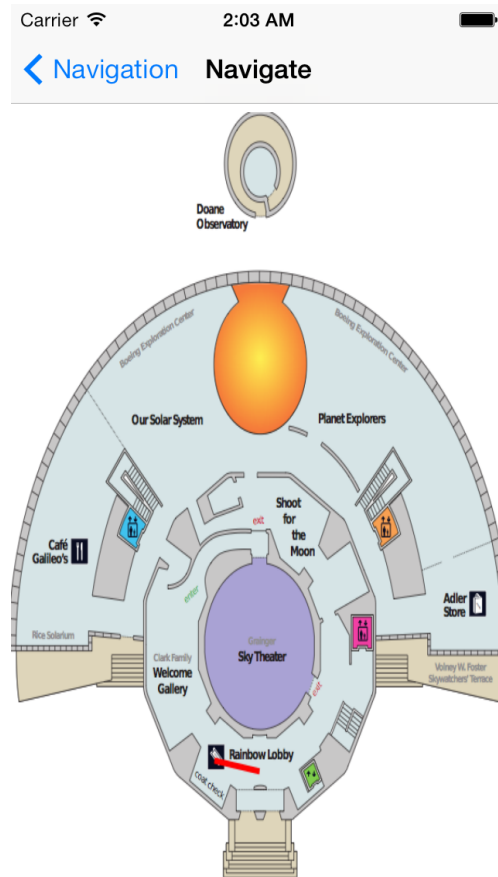

Ending in '?' – If you could provide a feedback.

6. Map Navigation Display: Displays after user clicks submit to show the path from A to B.

Things needed/To be modified:

- Will display text describing the path to take on the top.
- Is the map display image used okay or a new image needs to be used.
- Any other layout changes.
- A stepper will be added which will display the path in steps allowing easy navigation within the planetarium.
- Need text associated with each exhibit.

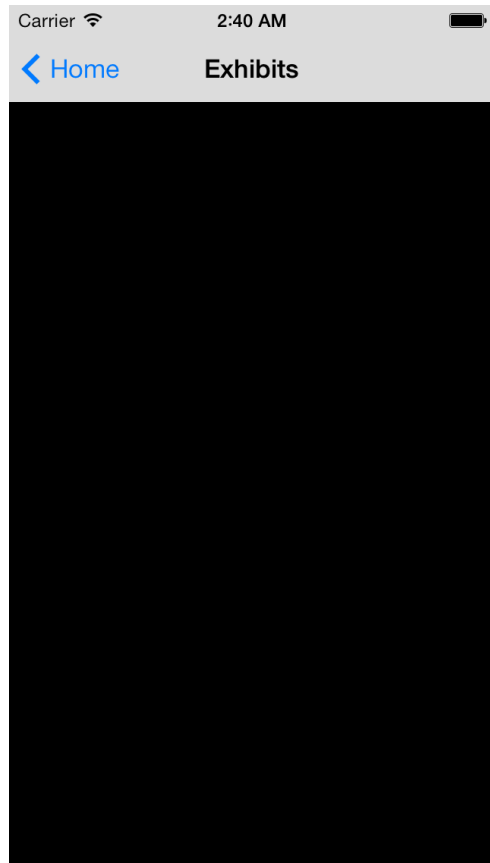

Ending in '?' – If you could provide a feedback.

7. Exhibits: This tab displays list of exhibits with their images. On selection a detailed exhibit info along with image will be displayed with the option of navigating to it.

Things needed/To be modified:

- A Collection view controller to display images and exhibit list.
- Information from the Adler website for exhibits.
- Any extra details need to be put in?

Ending in '?' – If you could provide a feedback.
